Date: March 16, 2016

Subject: Stop Delivery Order for Upcoming Safety Recall 22010

Models: 2014-2016 Chevrolet Caprice Police Pursuit Vehicles (PPV)

To: All Chevrolet Dealers

STOP DELIVERY ORDER

Effective immediately, stop the delivery of certain 2014-2016 model year Chevrolet Caprice Police Pursuit Vehicles (PPV) in new or used vehicle inventory. General Motors has notified the National Highway Traffic Safety Administration (NHTSA) about an upcoming safety recall that involves these vehicles. The GM recall number is 22010.

It is a violation of federal law for a dealer to deliver a new motor vehicle or any new or used item of motor vehicle equipment (including a tire) covered by this notification until the defect is remedied.

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 2014-2016 Chevrolet Caprice Police Pursuit Vehicles (PPV). Subject to the extended idling times and elevated temperatures experienced in typical police applications, these vehicles may experience loss of electric power steering (EPS) assistance while driving or idling as a result of fretting corrosion on the connector between the EPS module and the torque sensor. If power steering is lost, manual steering functionality is retained but would require an increased steering effort, particularly at lower speeds, increasing the risk of a crash.

To correct this condition, dealers will replace the steering gear assembly.

Until further instructions are received, involved vehicles that are in dealers' possession (new or used vehicle inventory, GM Certified Used vehicles, courtesy transportation vehicles, dealer shuttle vehicles, etc.) must be held and not delivered to customers, dealer-traded, released to auction, used for demonstration purposes or any other dealer use. All GM Certified Used vehicles currently in the dealers' inventory within the Certified Pre-Owned Inventory System (CPOIS) will be de-certified.

The Investigate Vehicle History (IVH) screen in the Global Warranty Management (GWM) system will be updated for this upcoming recall on March 17, 2016. This action has been taken to assist dealers with determining which vehicles are involved so they can properly respond to customer inquiries.

A list of involved vehicles that have been identified as being in dealer new vehicle inventory is attached to this message. It is sorted by dealer Business Associate Code (BAC) for easy reference. Your dealership's BAC will not be listed if none of the involved vehicles are currently in your new vehicle inventory. A file identifying involved

vehicles in dealer used inventory will be published in GM GlobalConnect, under the Service tab in Field Action Inventory Reports.

Until the recall bulletin is released, the Investigate Vehicle History (IVH) screen in the Global Warranty Management (GWM) system will display "N/A" under Release Date and "Incomplete – Remedy not yet available" under Status. This means the required repair is not yet available and dealers should not attempt to perform any repairs.

We are working with the supplier to obtain the required parts as quickly as possible. When a sufficient quantity of parts are available, the recall bulletin will be released and dealers can begin repairing vehicles.

END OF MESSAGE
