

TECH TIP: Vehicle Towed in - No start/No Crank Concern

NUMBER: TT007

MODEL: Optima (TF/QF)

DATE: 11/15/2013

Symptom: Vehicle towed in presenting a “no start/no crank” concern.

Repair: After checking all of the inputs needed to start the engine, check the starter solenoid snap-in connector for possible pin tension/damage concern. Check that the connector is firmly installed into the starter solenoid. This may correct the concern.

Note: Tech Tips are not a substitute for proper diagnosis.
