### WHY DOES MY 2001 HONDA ACCORD NEED REPAIR?

Honda has decided that a defect which relates to motor vehicle safety exists in certain vehicles. In some vehicles, the driver's front airbag inflator could produce excessive internal pressure upon deployment. If an affected airbag deploys, the increased internal pressure may cause the inflator to rupture (break apart). In the event of an inflator rupture, metal fragments could pass through the airbag cushion material and possibly hit you or others in the vehicle. Past ruptures like this have killed or injured vehicle drivers. Due to the severity of this defect, please call us immediately. Do not delay in contacting us.

### Honda will repair your vehicle free of charge (parts and labor).

Your Honda dealer will replace the driver's front airbag inflator, at no cost to you. While parts are available to conduct airbag inflator replacements at the time of this notice, the scope of the current airbag inflator recalls creates the possibility that the parts necessary to complete the recall repair may not be available at the time you call.

If this occurs, please discuss your specific needs and concerns with your dealer, including the provision of, or reimbursement for, temporary alternative transportation, as necessary. Once you make an appointment to repair your vehicle, be advised that the complete replacement process may take approximately 45 minutes; however, please ask your dealer for the specific time your vehicle will need to be at the dealership.
