New Safety Recall Advanced Communication – S84102816

FCA US LLC (“FCA US”) announced a safety recall on certain 2017 model year (KL) Jeep® Cherokee.

Some of the above vehicles may have been built with improper welds on the driver’s knee blocker airbag inflator. This could cause inadequate inflation of the knee blocker airbag when required and increases the risk of injury to the driver during a crash.

FCA US will conduct a voluntary safety recall to replace the driver knee blocker airbag on all involved vehicles.

Dealers will be notified of the launch of this safety recall by way of established methods used in the past.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries on involved vehicles.
