RE: Sure Power, Inc. Recall 13E050

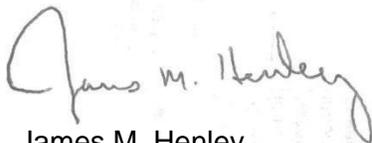

Dear Ms. Schuler:

On behalf of Sure Power, Inc., I am writing to correct the volumes of products included in this recall. The correct number of items of equipment included in this recall is 10,989. The correct number of motor vehicles in which the products were installed as original equipment is 37,493. The difference between these volumes and the volumes provided in the original Part 573 report is that the Part 573 report included products that were distributed in markets outside the United States, as well as products that were distributed for non-motor vehicle applications.

It is our understanding that the equipment recall 13E050 for which Sure Power, Inc. has responsibility will encompass the 10,989 items of equipment that were distributed in the aftermarket or as service parts.

Please let us know if you have any questions.

Sincerely,

James M. Henley
EPG Quality Assurance Director
